

SIXTEEN AUTOS WERE STOLEN IN FEBRUARY

Police Report Shows Eleven of This Number Have Been Recovered and Returned to Owners.

819 PLACED UNDER ARREST

Charges Included Variety of City Ordinances; 75 More "Drunks" Than in January.

The report for February of the local police department shows that during the month sixteen automobiles were stolen and of this number eleven were recovered, in addition to the recovery of nearly \$3,900 worth of other stolen property.

The following report was submitted to Mayor Hubbard Saturday morning by Chief of Police Allen:

Number of automobiles stolen during the month, 16; total value, \$13,600.

Number of automobiles recovered, 11; total value, \$11,600.

Number not recovered, 5; total value, \$2,000.

Other lost property recovered, \$2,625.

Finger prints and measurements taken, 45, including suspects, as follows: Burglary, 3; robbery, 1; forgery, 1; carrying concealed weapons, 2; larceny, 6; violating the narcotic act, 4; bad checks, 1; suspects, 5; violating the federal bank law, 2; pickpockets, 5; forgers, 3; I. W. W., 3. Of this number 15 were identified as having records elsewhere.

Bertillon cards and finger print copies received from other departments, 27.

Investigative received and information furnished other departments, 18.

Reports received from other departments on former help of this department, 22.

Total number of arrests made by the department was 819, of which 565 were for violating the city ordinances and 254 on miscellaneous charges.

The number of arrests for drunkenness amounted to 75 more than the month of January.

Wilson May Meet His War Chiefs in Europe

WASHINGTON, March 8.—President Wilson probably will be able to meet in Paris early in April with Secretaries Daniels and Baker, civilian heads of the army and navy respectively, Vice Admiral Sims, commander of the overseas naval forces, and General Pershing, commander of the American expeditionary forces. While so far as known no plans have been made for such an unprecedented meeting, officials today pointed out in connection with the announcement that Secretary Daniels would sail for Europe next week and that Secretary Baker expects to visit France soon after April 1, that such a conference could be held.

Many Spartacans Will Be Executed for Revolt

LONDON, March 8.—A great number of Spartacans were taken prisoner in the fighting in the center of Berlin Friday and will be sentenced to death, according to an Exchange Telegraph dispatch from Copenhagen.

French Girls Discard Headgear Which Hid Their Flowing Locks

PARIS, March 8.—Fashion girls of France are more than ever abandoning the close fitting native headgear, to wear which they had to have their tresses cut. In rural France there is a widespread movement for the adoption of the "towny" style, which, if less picturesque, makes for the preservation of woman's chief glory.

This fact, coupled with the total disappearance from the market of Chinese hair from which the cheap, or grade of "switches" and "tails" used to be made, renders false hair extremely expensive in France.

"There are no more so-called hair fairs held in France nowadays," says a prominent hair specialist, "and natural blonds are worth at least \$20 an ounce."

"AMERICAN ACE" OPENS TOMORROW

Famous Melodrama With 30 People in Cast at Empress Five Days.

The great "Ace" is today flying toward Tulsa. Sometime tonight or tomorrow morning early Taylor Granville and Laura Pierpont, stars of the big melodramatic thriller, will arrive in this city, with their company of 30 players, and tomorrow matinee they will begin their five day engagement at the Empress theater.

Bringing a large force of stage hands who are required to handle the remarkable electrical effects that accompany it, "An American Ace" arrives from Little Rock, where it concluded a week's engagement in that city and repeating there its sensational success in St. Louis, New Orleans, Dallas and the other big southern cities visited, where it smashed all attendance records.

Tulsa is the only city in Oklahoma the "Ace" will play. It goes straight from the Empress to Kansas City. This production is the greatest melodrama in years, a brand new, up-to-the-minute conception, a smashing story of love, heroism, daring, intrigue and treachery, and the most sensational stage effects ever produced on the stage anywhere are used in its presentation.

Seats are on sale now for every performance, from tomorrow night to the closing show Friday night. Positively no children in arms will be admitted during the engagement. Regular prices will obtain at every show, notwithstanding the "Ace" has shown to \$1.10 top in every other city.

New Hats Marked by January Shapes

There are jaunty shapes to suit every type of feminine beauty this season. There are turbans, high and low, flaring and narrow, tall crowned, narrow brimmed hats, low crowned, broad brimmed hats, models turned up in the front, at the back, on the side; many pokes and droops and then probably a few more that I have forgotten.

There are just about as great a variety of materials used as there are shapes, too. There is a pronounced tendency to use fabrics instead of straw or to combine straw with satin, georgette, or crepe de chine. The conventional ribbon, wings and foliage are much in evidence as trimming, but it is feathers which have taken on amazing forms and are being made to do wondrous things on the new spring chapeaux.

Plans For Soldier Memorials

World's Washington Bureau.

Post Building.

WASHINGTON, March 8.—Numerous suggestions have been made to congress during the last few weeks for memorials of different kinds for the soldiers, sailors and marines who have served in the war with Germany.

Two suggestions which are looked on with considerable favor in the senate and the house have been made respectively by Representative Isaac H. Hays of Ohio, a Union veteran of the war between the sections, and Col. Webb C. Hayes, chairman of the Cuba-China battlefield commission of the war department and son of former President Rutherford B. Hayes.

Colonel Hayes has worked out a plan whereby memorial tablets in county units can be erected in honor of the heroes without waiting for the return of the bodies of those who fell, as it undoubtedly will be some time before the bodies can be transported to this country. His suggestion, which has been submitted to the American Forestry association, includes the planting of memorial trees, and it means uniform memorials throughout the land as well as a hint to good roads, according to Colonel Hayes.

He has started the plan at Fremont, his home town in Sandusky county, Ohio, and William G. Sharp, who recently resigned his post as American ambassador to France, has followed suit by starting the movement at his home town of Ellettsville, in Indiana.

Tree Planting Is Favored.

"Plans are going forward for memorial tree planting all over the country, I am informed by the American Forestry association," said Colonel Hayes today in discussing the proposal. At Middletown, Ohio, the chamber of commerce has voted to plant memorial trees on the Dixie highway, and the chamber of commerce of Indiana has worked out a plan for memorial graves in each county of that state. In Kentucky and Tennessee plans are being discussed but no definite action has been taken.

That the American battlefield commission shall submit all plans for memorials at home or abroad to the national fine arts commission for suggestions or for approval.

That the American battlefield commission is hereby authorized and empowered to receive funds from na-

tional, state or county or city appropriations or by device, bequest, donation or otherwise, all of which shall be accounted for, and money expended by the quartermaster general of the army under the direction of the American battlefield commission.

It is pointed out that this last provision in the bill introduced by Representative Sherwood, if enacted, will offer a means of preventing exploitation of memorial funds through "fake" methods of unscrupulous persons. This is one of the most advantageous points in the proposal, it is said, as the department of justice officials here say that numerous attempts already have been made to get money for alleged memorials, the plans for which are entirely bogus.

By providing that these funds shall be handled by the quartermaster general of the army, such exploitation is eliminated.

That the commander-in-chief of the American expeditionary forces, the quartermaster general of the American army of occupation in Germany, the commanding general of the American troops in Russia, the commanding general of the American troops in Italy, the chairman of the Cuba-China battlefield commission of the war department and the librarian of the army war college be appointed members of the American battlefield commission and their successors be appointed by the secretary of war when vacancies occur.

That an associate battlefield commission be composed of one member from each state and the District of Columbia is hereby authorized, that the representative of each state shall assist in causing to be erected suitable local memorials to the dead of each state in the form of county memorial tablets, containing the names of all who died in the service of their country, placed on the courthouse or other suitable location in each county seat or on memorial highways extending from county to county.

WATER MEETING DELAYED BY ABSENCE OF ENGINEER

Because Henry A. Pressey, consulting engineer for the city of Tulsa, failed to put in his appearance Saturday the joint meeting of the allied civic committee and special chamber of commerce committee, called for the purpose of scrutinizing every piece of data collected by the engineer on Tulsa's available water sources, was postponed until some future date. Members of the committee did not believe that a meeting at which Mr. Pressey would be absent would result in any great progress toward a solution of the water problem.

A. G. Heggen, president of the Rotary club, and the recognized engineering ability of the committee, announced that the meeting will

probably be held Tuesday. In the meantime Mr. Heggen intends to go over the supplementary data included in the report that he may be in a position to explain the significance of every detail to his associates on the allied body without wasting any

time. Upon the recommendations to be made after the investigation by these committees probably depends to a great extent, the selection to be made by the city of a source from which to obtain its water.
